APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the place of use of the waters of an underground source as heretofore granted under Permit 51910, is issued subject to the terms and conditions imposed in said Permit 51910, and with the understanding that no other rights on the source will be affected by the change proposed herein.

This permit is issued subject to existing rights and is further subject to revocation if and when water can be furnished by an entity such as a water district or a municipality engaged in furnishing water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. It is understood that this right must allow for a reasonable lowering of the static water level. The well shall be equipped with a 2-inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 65678, 16987, Certificate 5726, shall not exceed 5.11 million gallons annually.

Permit 65678 is issued to provide water service to twenty lots described by Clark County Assessor's Parcel Numbers 096-35-702-002, 096-35-702-003, 096-35-702-004, 096-35-702-005, 096-35-702-007, 096-35-702-008, 096-35-702-009, 096-35-801-001, 096-35-801-002, 096-35-801-003, 096-35-801-004, 096-35-801-005, 096-35-801-006, 096-35-801-007, 096-35-801-008, 096-35-801-009, 096-35-801-010, 096-35-801-011, 096-35-801-012, and 096-35-801-013. Water service is limited to 700 gallons per day per lot and cannot be transferred or credited to any other lot.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.0217 cubic feet per second, but not to exceed 5.11 million gallons annually.

## 15. Remarks:

The purpose of this application is to expand the place of use of Permit 51910 to include the area included within the place of use of Permit 16987, Certificate 5726. Permit 16987 has as its source an unnamed spring which serves several residences. This application to change will have no effect upon Permit 16987.

Many years ago, individuals who resided outside of the place of use as depicted on the supporting map for Permit 51910, but within the place of use of Permit 16987, connected to the well, as evidenced by Permit 51910. Such action is a technical violation of the terms and conditions of Permit 51910.

The purpose of this application therefore is to allow up to 21 vacation-type homes to connect to the well previously permitted under Permit 51910, which permit is granted for 14 homes, each with a daily duty of 1,000 gallons. There will be no increase in duty.

The residences located within the proposed place of use are weekend cabins or retreats, with trivial amounts of landscaping. Therefore, the place of use may be expanded to include a total of 21 units, with a total duty far below the 5.11 mga previously granted under Permit 51910.
